

Toshiba Satellite Click Keyboard Keys Replacement

How to replace a single key on a key board.

Written By: Andre

INTRODUCTION

This guide will show you how to remove and replace most, to all of the keys on the Toshiba keyboard. replacing a key can be accomplished simply using one finger and a pry tool.

TOOLS:

- [iFixit Opening Tools](#) (1)

PARTS:

- [keyboard key](#) (1)

Step 1 — Keyboard Keys

- First, identify which key(s) need to be replaced, and/or removed and make sure a replacement key is purchased. We will be removing the P key.

Step 2

- Take the Pry tool and wedge it under the key.

Step 3

- Now pry the key upwards off of the keyboard until it is fully removed, should almost "pop" off.

Step 4

- Now place the new key in place of the key just removed. Use your finger to apply pressure on the key, and "click" it into place.

Step 5

- Now the key should be fully functional and ready for use.

To reassemble your device, follow these instructions in reverse order.
